Amendment #2008-01

Proponent: Philip Fairey

Signature: 

Organization: Florida Solar Energy Center

Mailing Address: 1679 Clearlake Road

City: Cocoa

State: FL

Phone: (321) 638-1005

Proposed Revision: (Specify Section to be revised. ~~Line through deleted text.~~ Underline added text.)

Modify Section 603.4.2 as follows:

603.4.2 Every home subjected to this sampling Standard shall be provided with a label in accordance with Section 303.3 of these standards, which contains the following statement: “This home has been certified using a sampling protocol in accordance with Chapter 6 of the RESNET Standards (see <http://resnet.us/standards/>). ~~As such, some or all of the energy features of this home may or may not have been individually inspected or tested.~~” This label shall be located on the electrical panel and the font shall be a minimum of 10 points.

Justification: (Must be provided. Supporting documents may be attached.)

The proposed change is the result of concerns expressed by the U.S. Environmental Protection Agency that Section 603.4.2 of the RESNET Standards is overly cautious and will likely give consumers unnecessary pause in their ENERGY STAR[®] Home purchasing decisions.
